

# **Supervisor meeting**

Tuesday, 14th of February of 2017

## **Status**

- We are on understanding the model and on several other tasks. We should be careful and take only the parts of the model that we need.
- We have made a short term plan for now.
- We will try to do small reports to know what we do, improve knowledge sharing and ensure things do not get lost in the process.

## **Notation**

- It is up to us, but it has to be clearly defined.

## **Reading Material**

- Depending on what we want, we can send either work in progress or finished sections.
- If the report gets too big, we should send a Dropbox link instead of attaching the document in the email.

## **Miscellaneous**

- Maybe write some worksheets of what we did and send them for next meeting.

## **Next Supervisor Meeting**

Wednesday, 22nd of February at 13:00
